Output signal formats

All Kübler encoders come standard with six channels where A leads B in the clockwise direction and the standard index is gated with A & B. The tolerance of the wave form affects the control and, in some cases, may affect the smoothness of system operation.

A leads B when the shaft is rotated in the clockwise direction viewing the shaft or collet end. This is the Kübler standard. This format applies to the pin key codes listed below.		Order code ⓘ		
standard	0 gated with A & B. This is the Kübler standard. 0 is 90° wide.	P03	0 ungated. 0 is 330° to 360° wide.

t_r = rising edge time
t_f = falling edge time
